**⚠ WARNING**

 **DANGER!** Danger when opening up the tool, as live parts are exposed. Before opening, unplug the tool to ensure disconnection from the mains. Before putting into operation, check power supply cord and connector as well as extension cable for electrical and mechanical damage.

 Incorrect use of the Hot Air Tool (eg. overheating of the material) can cause a **fire and explosion hazard**, especially near combustible materials and explosive gases. Do not apply to the same place for a long time. Heat can ignite flammable materials which are not in view.

 **Fire and burn hazard!** Do not touch the heating element housing and air nozzle when they are hot as they can cause **burns**. Let the tool cool down. Do not point the hot air flow in the direction of people or animals.

Before replacing a nozzle or storage after use, place the tool vertical down on its standing surface and allow it to cool down completely. If the Hot Air Tool switches off autonomously in operation (thermal relay), switch tool off or disconnect the power supply from mains. Before reusing, let the tool cool down.

**⚠ CAUTION**

 The **voltage rating** stated on the tool must correspond to the mains voltage. EN 61000-3-11;  $Z_{\max} = 0.215 \Omega + j 0.134 \Omega$ . If necessary, consult supply authority.

 For personal protection on building sites we **strongly recommend** the tool be connected to a **RCCB** (Residual Current Circuit Breaker).

 The tool must be operated **under supervision**. This tool may be used by children aged 8 or above and by persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they are supervised or have been given instructions on how to use the tool safely and understand the hazards involved.
